

# DM2000 Series

# Features

DM2028 - DM2032

## Three-Bladed Discs

With three blades per disc Kubota mowers are constantly cutting. This means a third less load per blade; an even load on the drive; smoother power usage; and produces a neat, cleanly cut stubble.

## Non-Stop BreakAway

If hitting an obstacle the Non-Stop BreakAway system will be activated and swing the machine backwards and over the obstacle and then return it to the original working position. No need to stop – no time lost.

## Fully Welded Cutterbar

The fully welded Kubota cutterbar with overlapping C-channels makes for a very stiff and strong design, ensuring very high level of durability. The cutterbar's high oil capacity ensures a very low working temperature for efficient oil cooling and lubrication of the entire cutterbar.

## Vertical Transport Position

When in transport, the mowers are folded to a vertical position well behind the tractor. The center of gravity is close to the tractor, which ensures excellent weight distribution and transport stability.

## Fast Lift on Headlands

The mower is easily lifted via a hydraulic cylinder without activating the tractor's 3pt linkage. The advantage is less wear on tractor and machine, as the PTO stays in the same position, minimizing vibrations in the transmission.

## Flexible Suspension

Due to the flexible suspension, the DM2000 series is exceptionally well suited for work on slopes and in hilly conditions, with an operating angle of 35° up and down.
